Excellent presentation!

I enjoyed this meeting because I learned about racism. I really enjoyed. Thank you. It was a really nice experience.

Gracias por darnos la oportunidad de participar. Siempre aprendo cosas nuevas y orientación de cómo mejorar y ayudar y servir a nuestra comunidad.

The presenter was prepared and knowledgeable on the subject. Need a longer session to discuss all the comments that came up.

Shannon presented her information in a way that helped you realize that all races has culture and difference that can make a great country.

I really enjoyed Shannon O'Brien's presentation on the African American culture.

Mrs. O'Brien just had my full attention. I loved to hear everything she was talking about. I wish everyone was like her! And if I can I am going to try to get her to speak at my school. She really touched me, wonderful speaker!!!

Was very insightful information, but some things need improvement on some cultures.
*Need a school for pregnant teen age girls where they will not feel they have to leave school.

What an asset! 

Shannon O'Brien is to all communities who care about its youth and their future. Thank you.

Very good meeting! Learning more about the African American Culture, very good education! Every culture has the same pattern. Thank you so much!

I think I enjoyed this one far better. Presentations like this should happen everywhere. Will this speaker be able to come do another seminar for us next month?

This was a great presentation. Thank you! Bringing this presentation to us brought us a lot of light in how our children feel at their school and how parents can help them by integrating themselves into different cultures but do not forget who you are!

I enjoy the culture experience tape. There was a lot of ideas shared at the meeting.

Todo estuvo excelente. Gracias por toda la información.

I like the presentation.

Thanks!

I very much liked this training session because it taught me about our history and the way we thought. It has had such an impact through today although our belief is that we have "evolved" when in fact we are still the same.
